

A UML class diagram for the `luaManager` class. The diagram consists of a single rectangular box divided into three horizontal compartments. The top compartment contains the class name `luaManager`. The middle and bottom compartments are empty, representing private and public attributes respectively.

```
classDiagram
    class luaManager {
    }
    class luaManager {
    }
    class luaManager {
    }
```
